PROFESSIONAL EXPERIENCE

Construction Engineer - Basra Gas Company

May 2019 – July 2020

Shell Oil Company/Secondee to Basra Gas Company, Basra, Iraq

Responsible for the safe delivery of pipeline infrastructure projects in the world's largest Flares Out Project utilizing red banded local contractors.

- Mentored new team members through the Shell Safety Culture.
- Developed and delivered preconstruction packages for stakeholder engagement.
- Implemented new safety strategies to encompass hearts and minds of contractor individuals.
- Lead for the Lifting and Hoisting aspect for all construction sites.

Small Projects Coordinator and Execution Lead – Appalachia

Jan 2011 – May 2019

Shell Oil Company, Wellsboro PA

Responsible for management and results of 8-person team consisting of engineering technicians, construction managers, procurement personnel, QA/QC document control and third-party engineering support. Team responsibilities include engineering, procurement, and construction of well pad facilities, pipelines, and compressor stations associated with production within Shell's Appalachia Unconventional Asset.

- Attained Goal Zero for HSSE for over 5 years.
- Lead the execution of FIMP, Development, and Well Pad Facility installations.
- Implementing strategies to reduce the current construction time frame by 10%.
- Developing project controls and lean initiatives to identify and eliminate waste through "Plan, Do, Check, Adjust" and A3 continuous improvement plans.
- Improved unplanned deferment numbers by 24%.
- Reduced Compressor Retrofit project cost by \$500K through challenging scope, utilizing internal resources, and driving down execution duration.
- Act as Small Projects Team Lead during 6-month gap in leadership.
- Provide constructability leadership during the assessment and design process of all projects.
- Mentor Instrument & Electrical focal through project delivery process resulting in the elimination of 3rd party engineering needs.
- Conduct weekly contractor engagement sessions that incorporate negotiations, management and oversight.
- Active member of the Operations Leadership Team.
- Accountable for Stakeholder management for successful planning, scheduling and handovers which drives down deferment and construction duration.
- Built Small Projects Team from the ground up and developed them to perform by using an unconventional mind set.
- Supported the establishment of a scaled project delivery roadmap for use within the small projects team.
- Perform competitive benchmarking to continuously challenge the standard.

CONTINUED

- Provide detailed knowledge of the entire operating infrastructure both internal and external to Shell, key to developing front end concepts.

Pipeline Supervisor –East Resources

Apr 2009 – Jan 2011

East Resources, Wellsboro, PA

Responsible for safe delivery of gas infrastructure from Concept Selection to Start Up maintaining budget and schedule accountability for all assigned projects

- Managed multiple contractors in delivering engineering, procurement, and construction tasks for multiple simultaneous projects within Tioga County region valued at \$50 MM USD.
- Delivered 3 Meter Stations, 2 Compressor Stations and 58 miles of pipeline within budget and on schedule.
- Developed collaboration with state and federal agencies to facilitate timely permit approvals. Decreased approval times from 12 weeks to 6 weeks.
- Controlled the procurement of construction material and company inventory.
- Drove down project cost by 30% through contractor engagement, risk management, and incentivised contracts.
- Facilitated contractor compliance testing and record retention.

Operations Supervisor – PPL Gas Utilities/UGI

Apr 1996 – Apr 2009

UGI, Westfield, PA

Responsible for managing a local Operations Center with 5000 natural gas customers. Supervised a team of 9 union employees that safely constructed, operated and maintained integrity of 1000+ miles of natural gas service, distribution and transmission pipeline.

- Customer Focus - Collaborated with team to develop a monthly publication for public awareness regarding hazards and benefits of natural gas use.
- Project Controls-Formulated guidelines for OPEX and Capex expenditures that supported best in class budget management.
- Managed full project stage gate process concerning a portfolio of capital and repair scopes.
